If your child meets the eligibility criteria and is in need of care management services, they can be enrolled into the Health Home Program.

What is a Health Home?

A "Health Home" is not a place. It is a group of health care and service providers working together to make sure that the child gets the care and services they need to stay healthy—at the right time in the right amounts.

What is the Health Home Goal?

The goal of the Health Home is to make sure children with Medicaid who have complex physical and/or behavioral health conditions get access to the care and services they need in order to be healthy.

Benefits of Home Health Care

It's not surprising if you may feel overwhelmed or confused.

It is very difficult to navigate through the many types of services that may be available to your child.

Until now, you may have had extreme difficulty getting access to the services your child needs or you may have had a hard time getting appointments.

You may not know what to expect from service providers and may be hesitant to ask the questions you need to in order to better understand your child's condition.

If you've faced a crisis with your child or child's condition and have not had someone to call for assistance, you now have someone who is able to connect you to the proper services.

Health Home Care Management can Help!
